New To This Edition

Personalize Learning with MasteringA&P®

MasteringA&P for *Human Anatomy & Physiology*, Tenth Edition is an online homework, tutorial, and assessment program designed to improve results by helping students quickly master concepts. Students benefit from self-paced tutorials that feature immediate wrong-answer feedback and hints that emulate the office-hour experience to help keep students on track. MasteringA&P's wide range of interactive, engaging, and assignable activities encourage students to actively learn and retain tough course concepts.

- MasteringA&P for *Human Anatomy & Physiology*, Tenth Edition features new Concept Map Coaching Activities, new Why This Matters Video Activities, Coaching Activities for Interactive Physiology 1.0 and new mobile-friendly Coaching Activities for Interactive Physiology 2.0, new Making Connections Questions, Focus Figure Tutorials, Art-Based Questions and Activities, Homeostatic Imbalance Clinical Questions, and more!

Assignable content includes:

- **NEW! Interactive Physiology 2.0 Coaching Activities** help students advance beyond memorization to a genuine understanding of complex physiological processes. Full-color animations and videos

demonstrate difficult concepts to reinforce the material. IP 2.0 features brand new graphics, quicker navigation, and more robust mobile-friendly interactivities where students can explore, experiment, and predict.

- **NEW! Why This Matters Video Activities** feature clinicians talking about how the content of each chapter applies to what they do in the field every day.
- **NEW! Concept Map Coaching Activities** push students to demonstrate a deeper level of understanding of a difficult and important course concept. In these higher-level, mobile-friendly assignable activities, students build free-form, auto-graded maps using key terms and linking phrases.
- **NEW! Making Connections Questions** challenge students to relate different concepts across body systems and chapters.

Guide students with a clear pathway through the material

- **NEW! “Key Concept” Modular Organization** helps students master the core material. Each chapter has been reorganized around key concept modules to help students easily navigate the chapter and maintain their focus. This clear and succinct presentation makes the core concepts more readily apparent and understandable to students.
- **NEW! Chapter-Opening “Chapter Roadmaps”** provide students with a visual pathway through the content. Each Chapter Roadmap orients students to the material, guides them through the chapter, and shows how concepts are related within and across chapters.
- **NEW! “Making Connections” questions** appear in every chapter (except Chapter 1), and challenge students to relate different concepts across body systems and chapters.

Prepare students for allied health careers with clinical coverage

- **NEW! “Why This Matters” videos** feature clinicians talking about how the content of each chapter applies to what they do in the field every day. For example, in the “Why this Matters” video for the tissue chapter, a nurse describes how his understanding of the process of tissue repair is crucial to treating patients with tissue damage, like bedsores. The first page of every chapter in the book features a QR code that students can scan with their mobile device to access the 1-2 minute “Why This Matters” video. The videos are also assignable in MasteringA&P.

Visualize A&P with art and media programs for today’s student

- **NEW! Mobile-Ready Interactive Physiology (IP) 2.0** delivers robust, interactive animations and videos on the toughest course topics. These are accessible on a variety of mobile devices for learning on the go.
- **NEW! Art-Text Integration** means that the text and associated art are covered on the same two-page spread, so that students do not have to flip back and forth through the material. Plus, every spread contains at least one figure, image, or table for a consistently visual presentation throughout.

Table of Contents
